PROJECTS

WeChat – Real-Time Social Chat Application

2026

React.js, Node.js, Socket.io, MySQL, Tailwind CSS

→ we-chat-taupe.vercel.app

- Built a full-stack real-time social chat platform with WebSocket-based messaging using Socket.io, enabling instant bi-directional communication between users with zero page refresh.
- Implemented secure user authentication (sign up/login), customizable user profiles with avatars, and online/offline status indicators, backed by a MySQL database for persistent storage.
- Developed group chat functionality and image/file sharing features, allowing users to create and manage group conversations and share media seamlessly.

Full-Stack Sales Analytics Dashboard

2026

React.js, Node.js, Express.js, TiDB Cloud

→ california-buritto-analytical-dashb.vercel.app

- Developed and deployed a full-stack sales analytics dashboard using React.js, Node.js, Express.js, and TiDB Cloud.
- Processed and visualized 300,000+ sales records through interactive dashboards and data analytics.
- Implemented secure user authentication, advanced filtering, and CSV/Excel export functionality.
- Optimized database queries and improved dashboard performance using indexed date-based filtering.
- Deployed the application using Vercel, Render, and TiDB Cloud with a responsive, mobile-friendly UI.

Cine-Versa – Movie Discovery Web App

2026

HTML, CSS, JavaScript, TMDB API

→ dushyanth3034.github.io/Cine-Versa

- Built a responsive movie discovery platform allowing users to browse trending films, search by title, filter by genre, region, rating, and year, and watch trailers instantly.
- Integrated the TMDB REST API to fetch real-time movie data including ratings, posters, and trailer links across Hollywood, Bollywood, and international cinema.
- Implemented multi-filter search with sort options (popularity, top rated, newest, box office) and paginated results, improving content discoverability.
